### Tips from Gabi Köberl:

## Argan\*:

The argan tree grows in Morocco and Algeria. For centuries, its fruit has been used to extract argan oil, an exquisite beauty ingredient with more than 80% linoleic and oleic acid. The phytosterols contained in argan oil reveal an extraordinary composition and therefore provide extra-special support for the vital functions of the skin. Argan oil stimulates new cell generation whilst smoothing the skin and keeping it soft and supple. Its high content of antioxidants combats free radicals – a natural fountain of youth for the skin.
