Tips from Gabi Köberl:

With the Aloe Vera Face Lotion and the Aloe Vera Cream you have a choice between rich and protective cream for the skin and a light-weight, moisturizing facial lotion. It is also possible to blend the two to suit the needs of your skin. Rub together a splash of the facial lotion blended with a suitable amount of the facial cream and apply to the skin. Each and every area of the skin absorbs the fat and moisturizing needs differently every day.
