*from controlled organic cultivation **natural essential oils

Tips from Gabi Köberl:

To create the look of glamorous and elegantly defined lips, outline the contours of your lips before applying your lipstick with the lip liner. This will help to prevent the colour from smudging out of the lip.

Gently smooth the lipstick onto the lips, pressing lightly but firmly. Press your lips together afterwards to evenly distribute the pigment. If you have applied too much, you can always blot your lips with a tissue to take away some of the colour.
