Tips from Gabi Köberl:

Preparation:

Qty Required:

20gm to 30gm – For Short Hair

40gm to 60gm – For shoulder length hair (Medium size hair)

70gm to 100gm – For waist length (Long hair)

Take required amount of powder as per hair length as mentioned above.

Add warm water to Organic Hair Color in 1:3 ratios (1 part of Organic Hair Color and 3 part of water).

Adjust the quantity of water as required to achieve a "yogurt or ketchup like" consistency. Paste should not be too thick or too thin. Apply the paste starting at the roots and spread evenly to the ends.

Application: Starting at the roots apply paste to hair immediately after mixing. Grey hair may require a heavier application of paste. Use the enclosed shower cap to cover hair after paste is evenly distributed

Finish: Wait at least 60 minutes after application of paste. If a darker color is desired leave the paste on for a longer period of time. It is safe for paste to remain on hair for two to three hours. Heat can also be applied with a hair dryer during this time to intensify results.

Rinse: After 60 minutes or more as desired, rinse hair with running water until the water runs clear. No shampoo is needed. Style and dry hair as desired.
