

Hair Coloring Brush

Manufacturer: Khadi
Order ID: Kh24454
Price: 21.00 €

Product description:

Simple and precise application of your khadi Natural Hair Color - with the khadi hair coloring brush made of highly absorbent natural bristles! The strong yet gentle bristles ensure an extensive and especially evenly application of your khadi Natural Hair Color.

Thanks to the wide and exceptionally absorbent bristles you can also apply the color cream on larger surfaces comfortably. But even single strands or small areas can be achieved with the khadi natural hair brush quite precisely and completely coated.

The natural bristles have the ability to absorb a lot of color paste and then gently and evenly release it. Therefore the application with your khadi natural hair coloring brush is extensively and also sparingly - so that no superfluous paint will drip down.

The handle of the natural hair brush is made of water-resistant, oiled walnut wood. Especially practical: with the tip end you can divide your hair strands exactly and fold them over to apply the herbal hair color!

The bristle ferrule is made of stainless steel.

Tips from Gabi Köberl:

First divide the desired strand with the tip end of the brush. Lightly moisten the bristles of your khadi coloring brush and dip it into the mixed natural hair color cream.

Wipe off surplus color cream on the edge of the bowl. Now apply the natural hair color cream on the desired area. Paint the color paste from the base to the tips. Use the entire bristle width for large areas and use for small areas only the top of the outer edge. Continue until all your hair is covered with color cream.

In order to enjoy your khadi natural bristles coloring brush for a long time, you should rinse it thoroughly with warm water at the end, dab it off and store it in a dry place.
