

Hair Oil Color Care

Manufacturer: Khadi
Order ID: Kh29545
Price: 13.90 €

Product description:

Color Care has a unique formula which naturally binds the color pigments of your khadi Natural Hair Color to the hair shaft. The plant extracts form a protective layer around your hair like a glaze which protects it from sun and mechanical stress - so your khadi hair color will last for a long time.

The secret of khadi Hair Oil Color Care is the magical power of the khadi elixir: selected Indian medicinal plants are traditionally boiled down gently over an open fire according to millennia-old Ayurvedic recipes.

The khadi elixier not only protects your hair color, but also cares for your hair. Ayurvedic medicinal plants such as Senna and Centella protect your hair. Broccoli seed oil provides intensive care without weighing it down. With well-nourished, well-cared for hair, the color appears more intense. As a result your hair color radiates in vibrant color.

You dye your hair with khadi Natural Hair Color? You want to lock your color result after coloring? You want to refresh your color results and add brilliant shine? Then the khadi Color Care hair oil is perfect for you!

In Ayurveda scalp and hair oil has always been used as a deep hair treatment. Hair oil builds up the hair from within. So the hair not only "seems" to be healthy, it shows its natural beauty and healthy strength.

Ingredients:

Sesamum Indicum Seed Oil*, Oryza Sativa Bran Oil*, Eclipta Alba Extract Leaf Extract*, Centella Asiatica Leaf Extract*, Cassia Italica Leaf Extract, Glycerin, Isoamyl Laurate, Caprylic/Capric Triglyceride, Azadirachta Indica Leaf Extract*, Brassica Oleracea Italica Seed Oil, Emblica Officinalis Fruit Powder*, Triticum Vulgare

*from controlled organic cultivation **component of natural essential oils

Tips from Gabi Köberl:

Apply khadi Hair Oil Color Care 24 hours after dyeing with khadi Natural Hair Color - before your first hair wash.

Simply put 2-3 pump strokes of khadi Color Care into your hand. Spread the oil in the palms of your hands and distribute them on dry hair. Concentrate on the dyed area as well as on the lengths and ends of the hair.

Alternatively, you can apply the oil with the khadi hair care brush - the natural bristles will distribute the oil evenly into your hair and scalp.

Now wrap your hair with a towel to keep it warm. Give the oil at least 30 to 60 minutes to soak in before washing your hair with a khadi shampoo. For a more intense effect, it is best to leave it on overnight.

Apply the natural hair care twice a week. You can also use the hair oil as a leave-in in small doses.
