Tips from Gabi Köberl:

First clean your hair with a silicone-free shampoo like khadi Amla Shampoo. For highlighted hair, use khadi hair oil before applying the color. khadi Golden Hint is ideal for the pre-treatment of light or blonde hair for the khadi haircolors Light Blonde, Medium Blonde and Light Brown. It is the only khadi Blonde nuance that is not permanent. Leave on for a maximum of 30 minutes.

Mix the khadi Natural Hair Color Golden Hint with 50 degrees hot water and stir with a whisk until it is spreadable. Use a brush to spread it evenly in your hair: Strand for strand - right up to the tips. If you only want to paint your hairline, spare lengths and tips.

Leave in the natural hair color for 30 minutes. The longer the khadi hair color stays in your hair, the more intense the gold accents - up to copper gold. If you want to cover up or neutralize violet reflexes, leave the khadi plant hair color on for at least 60 minutes. Then rinse with clear water - done.

Do not use shampoo for 24 to 48 hours. This way the herbal hair color shines in its full glow. If you then apply a khadi hair oil and let it work for 20 minutes, you fixate the pigments - for a long-lasting color experience.

Note: Each hair is different - the way we are all different. Therefore, the results vary. We recommend you test the natural hair color khadi Golden Hint only on a single, discrete test strand.
