

## Hair Colour Golden Brown

Manufacturer: Khadi  
Order ID: Kh16159  
Price: 11.90 €

### Product description:

Honey meets chocolate - khadi Natural Hair Color in the shade “Golden Brown” dyes your hair in a velvety-glossy, golden brown. The pure herbal ingredients give your hair intensive color reflexes and provide rich care. khadi Natural Hair Color, also known as Herbal Hair Color, add naturally radiant color, volume and shine to your hair. The natural pigments coat every hair like a protective color glaze.

Your individual result depends on your natural initial hair color: it ranges from a dazzling amber nuance to a rich, velvety shiny golden brown. Add golden shine and powerful resilience to your hair!

Valuable, purely herbal ingredients give your hair intensive color reflexes and provide rich care - intense color, great volume and healthy shine in just one step.

\*from controlled organic cultivation

### Tips from Gabi Köberl:

Wash your hair with a silicone-free shampoo like khadi Nutgrass Shampoo.

Stir the coloring powder with 50 degrees warm water until you receive a smooth and creamy consistency. Apply evenly with a brush: strand by strand - all the way to the tips. If you just want to color your roots, skip lengths and tips. If you prefer to apply the color without a brush, simply spread the color with your hands all over your head. The best thing is to get upside down over the bathtub.

Make sure, that you cover every strand of hair with dye and knead the color very well.

Leave the Natural Hair Color Golden Brown on between 30 and 120 minutes. The longer it sits in your hair, the darker the results will be. If you have already colored with this shade and just want to refresh your color, leave the color in your hair for 15 to 30 minutes.

After exposure time, rinse the Natural Hair Color with clear water only. Don't apply shampoo for 24 to 48 hours because during this time the color depth of your khadi Nuance has time to unfold.

To fix the new color pigments in your hair, you can use a khadi Hair Oil before the first hair wash after coloring. Leave the oil for at least 20 minutes and then wash it out with a natural shampoo. This will make your hair color last longer and adds additional shine.
