

Hair Colour Sun blonde

Manufacturer: Khadi
Order ID: Kh23369
Price: 11.90 €

Product description:

A hint of summer in your hair – khadi Natural Hair Color Sunrise colors your hair in a strong and warm blonde. The result depends on your initial hair color: On light hair you will receive a shiny honey color to a summery sun blonde. Dark hair receives golden to gently red-golden reflexes and a beautiful shine. khadi Sunrise also covers your grey hair – in a warm, sunny shimmering blonde. Please note that khadi sunrise does not have a brightening effect on your hair.

Herbal ingredients color gently and caring. khadi Sunrise is 100 % natural, vegan and free of synthetic ingredients. The natural pigments coat each strand of hair like a protective color glaze. Your hair feels healthy and voluminous. Use khadi Natural Hair Color for strength, volume and natural shine.

These ingredients are in your khadi Natural Hair Color Sunrise:

Senna/Cassia also called colorless henna is derived from the plant *Cassia obovata* or *Senna italica*. The grounded leaves nourish and repair the hair. They also provide moisture, volume and shine.

Lawsonia Inermis is more known under the name Henna. It provides the hair with sparkling shine and natural color. The intense color pigments from grounded stems and leaves of the henna plant coat every single hair, like a nourishing glaze. It also strengthens and nourishes the hair and scalp. Henna is used all over the world to color hair in the most natural way.

Ingredients:

Cassia Italica Leaf Powder, Lawsonia Inermis Leaf Powder

* = Certified organically grown

Tips from Gabi Köberl:

First clean your hair with a silicone-free shampoo like e.g. khadi nutgrass shampoo.

Then stir the powder of the khadi Natural Hair Color with 50 degrees hot water to a smooth and creamy consistency. Apply evenly in your hair by using a brush: strand by strand – all the way to the tips. If you just want to cover your roots, skip lengths and tips. You can also apply the Natural Hair Color without a brush, just by using your hands. Be sure to evenly distribute the color throughout the hair and knead well.

Now let the Natural Hair Color act between 30 to 60 minutes. To achieve a delicate honey tone, up to 30 minutes are enough. For a warm, strong summer blonde you need an exposure time of 60 minutes or more.

Then rinse the color only with clear, warm water - done. Do not shampoo for 24 to 48 hours. During this time the color unfolds its intensity.

To set the new color pigments in your hair, you can use a khadi hair oil before the first hair wash after coloring. Leave the oil on for at least 20 minutes (the longer, the better) and then wash your hair with a natural shampoo. This will help to your khadi color longer.

Note: Every hair is different – as we are Therefore, results can vary with natural colors. We suggest you test die khadi natural color Sunrise on a non- visible strand of hair. Please note that khadi sunrise does not have a brightening effect on your hair.
