Product description:

khadi Color Prep makes it easier than ever before to prepare your hair for coloring. Every hair color is naturally unique – and so are khadi Natural Hair Colors. khadi Color Prep prepares your hair for coloring with khadi Natural Hair Color and helps you achieve consistent, reliable results, especially when you transition from a very fair shade to a darker color. Discover the two most important applications of this product under “Application.”

khadi Color Prep is more than just a color-intensifying pre-pigmentation for your favorite hair color; it also contains senna/cassia, which is like a revitalizing keratin treatment for your hair. It strengthens and protects your hair and smooths damaged strands. Ziziphus moisturizes your hair, using a traditional Ayurvedic method to restore its natural shine from the inside out. Henna helps create the warm blond or intense copper that makes the perfect base color for long-lasting coloring in dark, ashy shades. It also soothes the scalp and strengthens the hair from root to tip.

khadi Color Prep: the perfect base for consistent, reliable color results

As a first step in transitioning from a very fair shade to a very dark color, we recommend that you prepare your hair with khadi Color Prep: the finely ground powder contains nothing but high-potency plant-based ingredients, and it colors your hair in shades ranging from warm golden blond to intense copper. This base color is perfect way to prepare your hair for coloring with khadi Natural Hair Color. This first layer of warm color provides the ideal base for the cool shade you plan to apply. Additionally, pre-pigmenting your hair with khadi Color Prep strengthens the intensity of the color you choose and ensures that it stays brilliant for a long time!

Ingredients:

Cassia auriculata leaf powder*, Lawsonia inermis leaf powder*, Ziziphus jujuba leaf powder*, Ziziphus spinachristi leaf powder*. 100 % organic of total

*from organic agriculture

Tips from Gabi Köberl:

khadi Natural Hair Color is brilliant and long-lasting. Using khadi Color Prep on very fair hair will help to produce more intense results. khadi Color Prep pre-pigments the hair and provides the perfect base for transitioning from a very fair shade to a darker color.

We all know the feeling: as your hair grows out after chemical coloring, the contrast between your roots and the dye becomes very obvious! As a base color, khadi Color Prep lends your roots a warm golden blond or intense copper hue, making it the perfect preparation for coloring your hair with your desired shade of khadi Natural Hair Color. It creates a much smoother transition between your roots and your chosen shade and provides excellent gray coverage.

Application:

1. Wash your hair with one of the khadi Natural Shampoos.

TIP: Use khadi Deep Charcoal Cleanse hair mask to remove any synthetic residue left on your hair by chemical dyes or silicone-based products, if necessary.

2. Mix khadi Color Prep with warm water (80°C) to make a cream.

3. Carefully apply it to your hair just as you would apply khadi Natural Hair Color.

4. Leave khadi Color Prep in for 60 minutes, then rinse thoroughly with water. Select the khadi Natural Hair Color you like best, and follow the application instructions to color your hair.
