Tips from Gabi Köberl:

Each morning after cleansing and toning, apply a few drops to your palms and evenly apply to the face, neck and décolleté with your finger. For combination skin, using Revitalising Day Cream together with a few drops of Clarifying Day Oil provides ideal daytime skin care. Simply mix the two products in your hand and apply to the skin, avoiding the eye area. In the evening, we recommend using Night Serum or Renewing Night Conditioner as a non-oily night time skin care product.

For combination skin combine Clarifying Day Oil with a small amount of Revitalising Day Cream to work against signs of blackheads and hardened skin.

For sensitive, reddened skin combine Rose Day Cream with Clarifying Day Oil for soothing protection against harsh weather.

Whatever your skin condition, Clarifying Day Oil can be applied over your daytime skin care products to provide added protection against the cold.
