

Silver ointment No.33

Manufacturer: Bioturm

Order ID: BT111

Price: 14.95 €

Product description:

With micro silver - an effective active ingredient.

The micro silver we are using is combined with zinc, a proven active ingredient. This combination is the secret of an ointment which helps to calm the skin in case of neurodermatitis, damaged, reddened or itchy skin. Pure vegetable oils provide the skin with high-quality lipids and moisture. Irritations are soothed, the skin calms down.

Our Silver ointment No.33 for local application of severely affected skin areas reduces inflammations and redness especially during the acute phase, it cares for the skin and makes it supple. Your problem skin gets what it needs to recover and remain healthy!

The antibacterial effect of silver which is contained in our Silver ointment No.33 also improves the skin appearance of teenager's problem skin (impure skin/acne).

The silver we are using is micro silver which cannot penetrate into the skin because of its size; it remains on the skin until next cleaning. We are NOT using nano silver.
