### Product description:

Therapy-related basic care in case of neurodermatitis, with colloidal oatmeal!

We are using colloidal oatmeal combined with our lacto-intensive active complex and have thus developed an ointment which helps to interrupt the itch-scratch cycle and calm irritated skin, especially in case of neurodermatitis.

The regenerating ingredients of oatmeal, such as avenanthramide and beta-glucan primarily reduce itching and also improve the appearance of reddened and irritated skin.

Our Ointment with oat No.93 is suitable for therapy-related basic care in the treatment of neurodermatitis. Also available as more rich Lotion with oat.

Apply several times daily to affected areas as needed.

In the acute phase we additionally recommend our Silver ointment No.33 because of its antibacterial effect.
