

Tinted Facial Sun Cream SPF 30

Manufacturer: I&M
Order ID: 523226
Price: 19.90 €

Product description:

Daily skin care as if kissed by the sun

This tinted facial sunscreen gives the skin a smooth, sunny appearance with optimal protection. Its mineral UVA/UVB filter offers a sun protection factor of 30, ensuring direct protection for the face against the sun's rays — waterproof and with no nanoparticles¹.

- Mineral filter
- UVA/UVB protection with SPF 30
- Waterproof
- Fragrance-free
- Medium tint
- No white residue
- Ideal as a tinted daily skincare product
- No nanoparticles¹
- Reef friendly

As a versatile daily skincare product with a matt finish, this tinted sunscreen also offers the benefits of its nourishing organic plant extracts — without leaving a white residue. Designed for a medium skin tone, it creates a naturally sun-kissed complexion.

Karanja oil, vitamin E and sunflower

The tinted sunscreen's mineral UV protection is enhanced by gentle karanja oil. Obtained from the seed of the Indian beech, it counteracts premature skin ageing with its antioxidant substances, while providing additional light protection and soothing skincare. Together with plant-based vitamin E, it protects the skin's own cells from free radicals.

Cold-pressed sunflower oil from certified organic sources also has exceptional pampering properties: It replenishes the skin's natural oils, protects against dryness and leaves it looking radiantly smooth.

Tinted sunscreen for a sunny glow

Ideal as a tinted daily skincare product, this vegan sunscreen gives facial skin a beautifully healthy tan for exceptional everyday results. The sophisticated waterproof sunscreen is also free from nanoparticles¹ to help protect coral reefs and water quality. As a result, Sun Protect tinted sunscreen offers dual protection for facial skin and the environment.

Tips from Gabi Köberl:

Apply generously before exposure to the sun. Reapply regularly for optimal sun protection. The Sun Protect SPF 30 facial sunscreen is waterproof. However, it should be reapplied after long periods in the water. Staining might be possible.
