

Sun Spray SPF 50

Manufacturer: I&M
Order ID: 523322
Price: 19.90 €

Product description:

Pshh Pshh! Mineral spray-on sun protection

Waterproof Sun Protect Sun Spray provides every skin type with safe, broad-spectrum sun protection from head to toe. This fragrance-free organic sun care protects against UV light with an extra-high sun protection factor of 50 thanks to its mineral filter – and also instantly protects baby and children's skin from sunburn.

- Mineral filter
- UVA/UVB protection with SPF 30
- Waterproof
- Suitable for babies and children
- No whitening effect
- No nanoparticles¹
- Reef friendly

Thanks to its light formula, this sun spray is quick and easy to apply. It spreads smoothly and absorbs rapidly, leaving no white residue. No traces of that bothersome whitening effect with this mineral sun protection which makes it suitable for both light and dark skin types.

Vitamin E, jojoba and karanja

Vegetable vitamin E and the finest jojoba oil provide antioxidant and cell-protecting properties. The mineral UV protection is reinforced by mild karanja oil. It provides additional sun protection and soothing care for the skin. Cold-pressed organic sunflower seed oil ensures silky smooth skin. It maintains the skin's own moisture and

replenishes its lipid content. The perfume-free Sun Protect sun spray is completely without fragrances, ideal as a sunscreen for babies and children.

Coral reef friendly sun spray without nanoparticles¹

This vegan, organic sun spray has a mineral filter to protect against UVA/UVB radiation with SPF 50 – without nanoparticles¹. With regular use, it prevents premature, light-induced skin ageing and pigmentation spots.

As a waterproof sun care product, this vegan sun spray also provides the body with valuable sun protection, whether in the mountains or on the beach. At the same time, in the water, this non-nano¹ sun spray really shows off its eco-friendly side because it is reef friendly and therefore harmless to coral reefs and open waters.

Tips from Gabi Köberl:

Shake vigorously for at least 10 seconds before use and after a long standing time. This ensures optimal distribution of the protective mineral filter in the spray.

Spray generously and rub into the skin before exposure to the sun. Reapply regularly for optimal sun protection. The Sun Protect Sun Spray with SPF 50 is waterproof. However, it should be reapplied every time you come out of the water.
