

Rose Water Hydrolate

Manufacturer: I&M
Order ID: 573200
Price: 10.90 €

Product description:

Gently harmonising with a delicate rose fragrance.

Rose water soothes every skin type with its harmonising care properties. Made from finest Damask rose blossom oil from controlled organic farming, this hydrolate naturally moisturises normal skin, as well as skin prone to dryness after cleansing. This not only increases the skin's resistance, but also protects it from external influences.

As this floral water is preserved without alcohol, it prepares the skin particularly gently for subsequent care. At the same time, it irresistibly refreshes the complexion with its delicate rose fragrance.

Pure rose

Our rose hydrolate is distilled from virgin organic rose oil and added water. In this special distillation process, the steam produced by heating absorbs the pure oil from rose blossoms. As with classic flower distillation, the result is pure hydrolate.

This gives the floral water its nurturing properties and the lovely delicate scent of rose. For natural cleansing and smooth skin – without alcohol.

Ingredients:

ROSA DAMASCENA FLOWER WATER, LACTOBACILLUS FERMENT, BENZYL ALCOHOL*, CITRONELLOL*, EUGENOL*, GERANIOL*

* natural ingredient of rose water

Tips from Gabi Köberl:

Spray onto facial skin as and when required or apply to a cleansing pad after cleansing and gently run over face, neck and décolleté – avoiding the mouth and eye area.
