Product description:

Anti-ageing night cream with natural coenzyme Q10

Our basis sensitiv Anti-Ageing Night Cream supports the natural regeneration of the skin during the nocturnal rest period. With its antioxidant properties, the gentle and well tolerated formula with natural coenzyme Q10 combats premature skin ageing and visibly reduces fine lines and wrinkles while you sleep. Feel the quickly absorbed texture gently melt into your skin, providing it with long-lasting moisture – for noticeably smooth, extra soft skin in the morning.

Gently nourishing formula for naturally smooth skin:

- Reduces wrinkles
- Combats signs of ageing
- Supports the natural regeneration of the skin

Organic jojoba oil absorbs quickly, protects skin from moisture loss and leaves it feeling silky smooth.

Organic shea butter contains lots of valuable ingredients such as vitamin E; due to its intensely nourishing properties, it is used in our products.

The natural coenzyme Q10 is involved in cellular energy metabolism and its antioxidant properties protect the skin from premature ageing.
